

Alexis Pineda

After having studied at Instituto Profesional Arcos, Alexis joined our habitat and enriched it, as he came over with a thousand new ideas and absolutely willing to give the best of him.

Alexis was born in the land of *jogo bonito* (Brazil) from Chilean parents. He arrived in Chile when he was 8 and could hardly speak Spanish. At school, he learnt the language and started to feel attracted to the world of shapes, colors and music, making the drums his preferred instrument.

Alexis confesses to us that he loves developing multimedia concepts and elements, for he is sure they are a most powerful and efficient communication tool. In fact, all of his previous jobs made him participate in the making of interactive CD's for different companies and agencies, such as:

- # Termas Puyehue, Chile
- # Presentation for Ecol, Chile.
- # Presentation for Hotel Kennedy, Chile

Alexis is a serious user of Macromedia Flash, and is most proud of the use he made of this program in the website of Chile's first newspaper: [Aurora de Chile](#) .

Both Alexis and Lily are Newtonberg's creative team. They get along well with each other, and, in a short span of time, have consolidated as a great design duo, strengthening this area in our company. They have been generous in endowing our work with their knowhow and sensibility.
