

Clean Air Initiative

Client

The World Bank

Activity

Because our team has considerable experience in managing environmental information, Newtonberg was asked to build, in the second semester of 2003, the site for the Clean Air Initiative in the World. The portal has four subsites in different languages (Spanish, French, English and Portuguese). Here, the documents were made by The World Bank, and we were in charge of their edition, classification and the modelling of the portal.

Currently, Newtonberg provides technical and editorial support to the members of the Initiative.

Description

- # Multilingual version of CMS
- # Downloadable documents
- # Contents available in 4 languages
- # Subsites (channels) which share contents
- # Editorial team updates contents from Washington, Asia and Latin America
- # Information is organized by topic, author, institution and cities
- # Management of mail lists

Other sites

Also, using the same content management system, the team of professionals of the WB for the Asian region developed and updated the BAQ 2004 site by themselves. The BAQ is an annual event about Air Quality in Asian cities. The site is administered from the platform and installation of Newtonberg Engine, currently hosted in servers located in USA.

Technology

Newtonberg Engine content management system. Integration of mail lists with Mailmanager.

Sites

- # www.cleanairnet.org Global Portal (English version)
- # www.cleanairnet.org/lac Portal for Latin America (versions in English, Portuguese and Spanish)

- # www.cleanairnet.org/caiasia Portal for cities in Asia (English version)
- # www.cleanairnet.org/ssa Portal for the Sub Saharan Africa region (English and French versions)
- # www.cleanairnet.org/baq2004 Better Air Quality (BAQ) workshops
